

Applications

This unit is used to disinfect roads, streets and surrounding areas within industrial and commercial plants.

The complete unit is mounted on a rigid frame with the provision of portability, easy access, and handling.

The unit can be fixed on a pickup truck, vehicle or any trailer with similar or higher loading capacity in terms of weight and dimensions.

If there is an open area infected, suspect to be infected or needed to be applied as a routine hygienic procedure of your facility, the Disinfectant Unit is your best choice.

Mobile Disinfection Unit

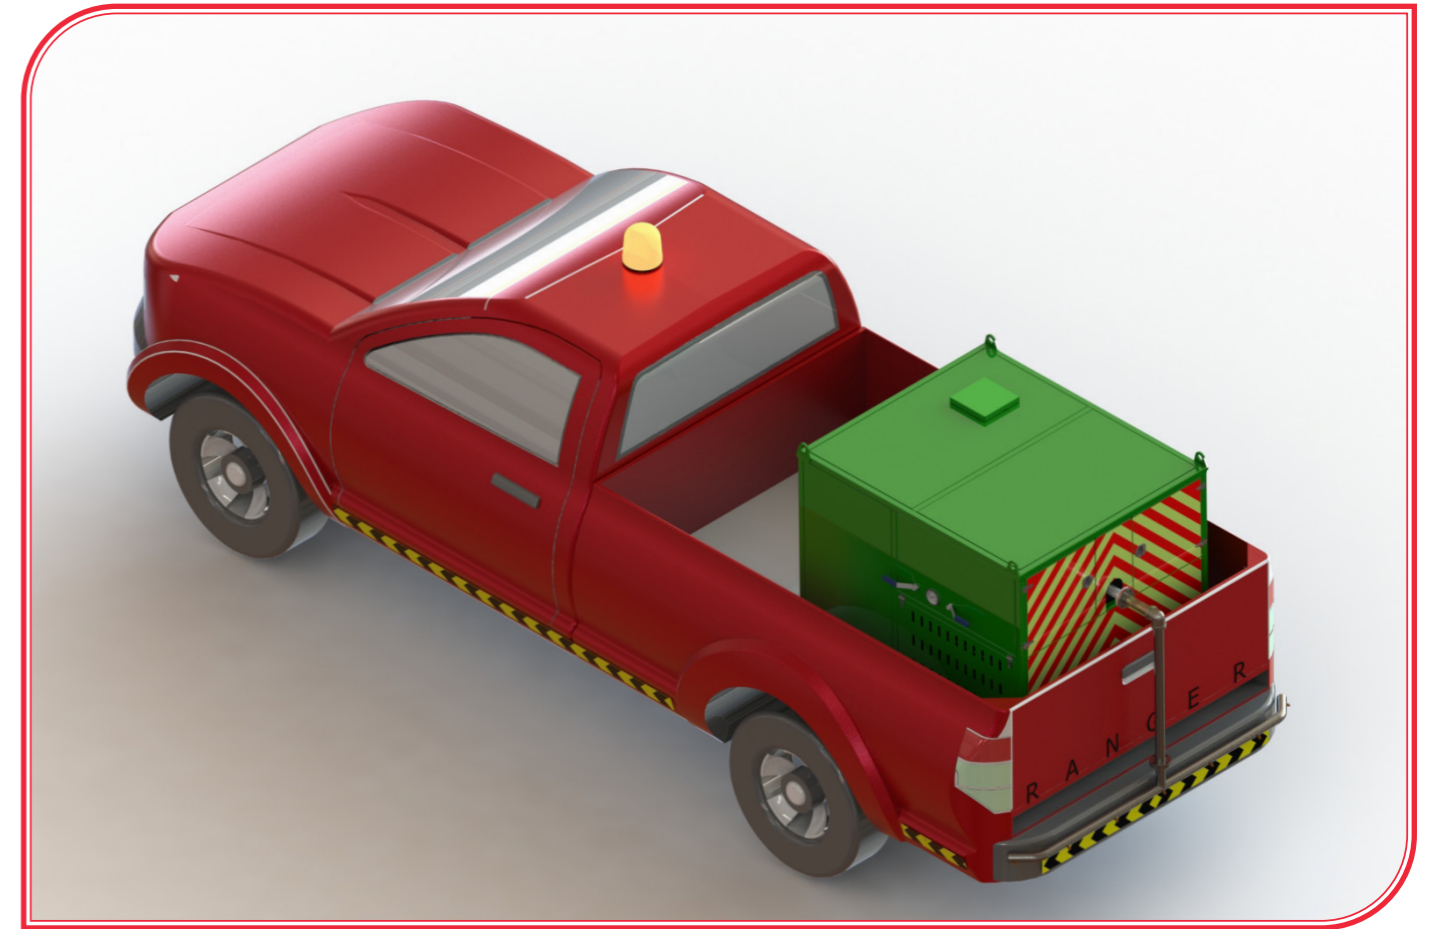

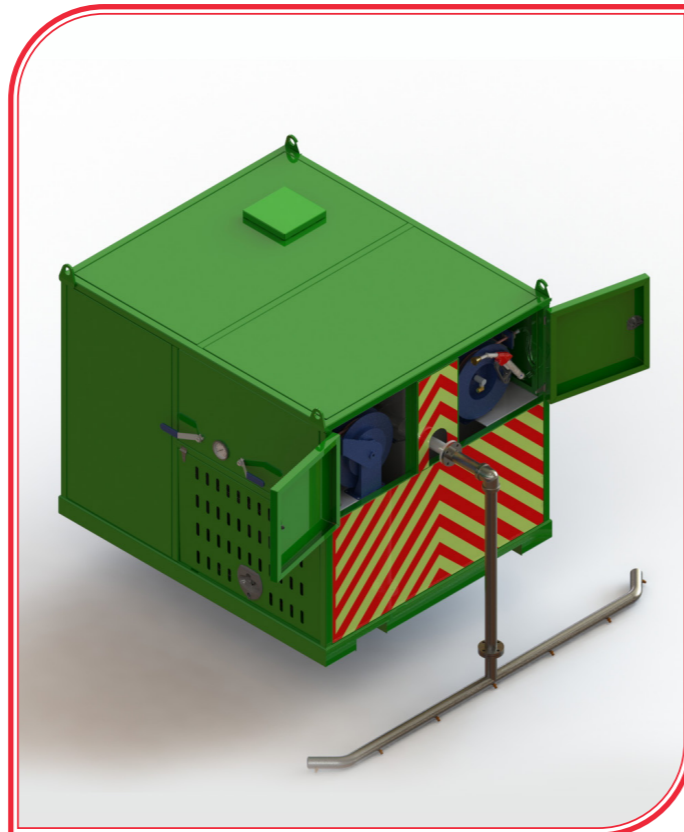

Mobile Disinfection Unit

Features

- Equipped with all the required equipment, tools, PPE, disinfectant chemical, tank & self-powered pressure pump.
- A fixed spray system to cover fixed radius around the vehicle.
